Notes:

- Indicates the respective PFOA, PFOS, or the combined PFOA/PFOS concentration exceeds 70 ng/L
- (a) United States Environmental Protection Agency (USEPA) Drinking Water Health Advisory (HA) for PFOA and PFOS, May 2016
- < Less than the method detection limit, or Non-Detect
- * The analyte was positively identified, and the result is usable; however, the analyte concentration is an estimated value.
The analyte detection was below the reporting limit.
- No drinking water sample was collected from the residence
- DNE PFOA and PFOS concentrations did not exceed their respective method detection limit, therefore no combined concentration listed
- HA Health Advisory
- ng/L nanogram per liter, or ppt (part per trillion)
- USEPA United States Environmental Protection Agency
