JH Airport Parking Availability

Jackson, Wyoming – With improved parking capacity and an expected downturn in travel because of COVID 19, limitations on public parking at the Jackson Hole Airport are not expected this holiday season.

For the past few years, the Airport leased space at the Town of Jackson’s downtown parking garage to provide additional parking for, and encourage ride sharing by, airport passengers. These ride sharing programs no longer exist, and community members are inquiring about options for extended parking and airport transportation. With increased parking capacity, and anticipated reduced holiday travel, the public is encouraged to utilize parking at the Airport. Within the Town of Jackson limits there is currently not an option for long-term public parking. Individuals may park on the first 3 floors of the Town’s public parking garage (located on the corner of Simpson Avenue and Millward Street) for up to 48 hours.

“Though adequate parking should be available at the Airport this holiday season, to the extent consistent with COVID protocols, we continue to encourage the use of taxi’s, ride shares and other forms of transportation to the Airport,” suggested Jim Elwood, Executive Director.
